

DER POST-FLOOD NEEDS ASSESSMENT DISTRICT SUMMARY FORMAT
ONE FORM TO BE COMPLETED FOR EACH DISTRICT

District Name:	Jenaidah
----------------	----------

District's Main City:	Jenaidah Sadar
-----------------------	----------------

1. LOCATION of the disaster:

# of Fully Affected Unions of all Upazilas in this District:	# of Partially Affected Unions of all Upazilas in this District:	# of Unaffected Unions of all Upazilas in this District:
Total: 36	Total: 27	Total: 4

2. Information on the FLOOD:

a) How high above the Danger Level was the water level in this upazila during the Flood - 2004, and when ?	3 feet above the danger level
b) When did the water level rise above a 'normal' flood level ?	13-Sep-04
c) When did the water level fall below a 'normal' flood level ?	At the same level
d) Did the floodwater level fall at any stage during this period - if so between which dates?	11-18 Sep-04
e) When was the last time that the floodwater level was as high as this time?	17-Sep-04
f) When was the last time that the flood lasted as long as this time?	

3. Information on the Population:

(a) What is the total population of the district ?	1,655,806	
(b) How many people in the district are affected in total ?	1,121,300	
(c) How many families in the district are affected in total ?	224,261	
(d) How many births have there been during the flood period ?		
(e) Where did these births take place ?		
(f) Was a trained attendant present at the deliveries ?		
(g) How many people have died by drowning / flood-related accidents and diseases (disaggregated by age / sex) ?	Men: Male children: Women: Female children: Total adults: Total children:	
(h) How many people have been injured or fallen sick due to the flooding (disaggregated by age and sex) in the district ?	Information not available	
(h) How many people have been injured or fallen sick due to the flooding ?	Information not available	
(i) How many families in this district had to evacuate their homes and take refuge in other places ?	Information not available	
(j) Where did these families take refuge ?	Schools, colleges and high land	
(k) Tick up to 6 boxes to identify the main problems faced by the population because of the floods:	Actually during the floods	After the floods (now)
i. No access to safe drinking water	No access	
ii. No access to sanitation facilities	No access	
iii. No access to healthcare	No access	

iv. No access to family planning services	No access	
v. No access to skilled attendants at birth	No access	
vi. No ability to cook	No ability	
vii. No power supply	No power supply	
viii. No transportation	No transportation	
ix. Erosion of housing	Erosion of housing	
x. Robbery of possessions	Robbery of possessions	
xi. Loss of income	Loss of income	
xii. Lack of wage-employment opportunities	No	
xiii. Lack of seed/seedlings	Lack of seed/seedlings	
xiv. Food insecurity	Food insecurity	
xv. Long-term unemployment	Long-term	
xvi. Others (specify)		

4. HEALTH & NUTRITION:

(a) What are the diseases normally experienced at this time of year ?	Skin diseases, diarrhoea, stomach upsets					
(b) Have any diseases increased because of the floods ? If yes, which diseases ?	Yes, skin disease, diarrhoea					
(c) Are there any possibilities of further serious disease outbreaks ?	Diarrhoea					
(d) Are there a significant number of sick/ill persons at this time ?	Information not available					
(e) What is the main limitation on patients receiving the treatment they need ?	Food					
(f) Has the flood caused any damage to the government's medical facilities in this district ?	Partially					
(g) Has the flood caused any routine health/nutrition services (e.g. immunization, antenatal care, provision of iron-folate/vitamin A supplements) in the area to reduce or stop and, if so, why ?	Partially affected					
(h) Are there any facilities in place to monitor and/or treat severe malnutrition ?	No					
(i) Are there any signs (e.g. swollen belly, wasting, night blindness, etc.) of severe malnutrition in the following:	Children under 5 years:		Pregnant & lactating women:		The general population of the district:	
	No information					
(j) Has there been any increase in the no. of malnourished since the flood and, if so, how much ?						
(k) Were there any deaths of severely malnourished children in the district:	Prior to the floods:		During the floods:		Following the floods:	
(l) What types and amounts of health & nutrition-related relief assistance has already	Item:	No		No		No
	Unit:					
	Amount:					

been / is now being provided by the various actors, such as GoB, INGOs, NGOs, etc. ?	Item:					
	Unit:					
	Amount:					
(m) What are the stock levels of the following basic medicines ?	ORS	WPTs	IVS fluids	Other (1)	Other (2)	
(n) Is this sufficient to last for the next 3 months ?						
(o) In the district, what shortages related to health and nutrition are there and hence what are the IMMEDIATE/SHORT-TERM MEDICAL & NUTRITION NEEDS of the population due to the floods:						
<u>Item</u>		<u>Quantity</u>	<u>Unit Cost (Tk.)</u>	<u>Total Cost (Tk.)</u>		
Medicine				0		
Baby food				0		
(p) In the district, what are the LONGER-TERM HEALTH & NUTRITION SECTOR REHABILITATION NEEDS due to the floods:						
Three month				0		
(r) Any other remarks:						
None						

5. WATER & SANITATION:

Type of drinking water sources (in the district):	Piped water systems:	Deep tubewells (DPHE):	Deep tubewells (private):	Shallow tubewells (private):	Dug & other wells:	Surface & rain water systems:
(a) % of water from these sources:	70%	30%				
(b) How many of these water sources are normally available in the district ?	50					
(c) How many of these sources have been damaged/contaminated ?	90					
(d) What damage/contamination has been sustained by these sources ?	No					
(e) How many of these damaged sources is repaired and back in use ?	No					
(f) How many of these water sources is operating right now ?						
(g) How many of these water sources still need to be repaired in the area ?						
(h) How many of these water sources still need to be replaced / reinstalled ?						
(i) Is there adequate water supply in terms of quantity and quality ?						
Type of sanitation (in the district):			Water-sealed ring-slab:	Open-pit (unhygienic):	Other (specify):	No latrine:
(j) What % of the population in the district has the following sanitation arrangements ?			40%	35%	5%	20%
(k) How many of these has been damaged and is now unusable ?			30%	35%	5%	20%

(l) How many latrines have already been repaired ?		Not known	Not known	Not known	No latrine
(m) How many latrines still need to be repaired ?		100%	100%	100%	100%
(n) How many latrines/sanitation arrangements need to be completely replaced or installed anew ?		1			
(o) What are the alternative sanitation arrangements in the places without functioning latrines right now ?		Open air defecation			
(p) What types and amounts of water & sanitation-related relief assistance has already been / is now being provided by the various actors, such as GoB, INGOs, NGOs, etc. ?	Item:	Not available			
	Unit:				
	Amount:				
	Item:				
	Unit:				
	Amount:				
(q) In the district, what shortages related to water and sanitation are there and hence what are the IMMEDIATE/SHORT-TERM WATER & SANITATION NEEDS of the population due to the floods:					
<u>Item</u>		<u>Quantity</u>	<u>Unit Cost (Tk.)</u>	<u>Total Cost (Tk.)</u>	
Drinking water					
Saline					
Hallow tab		1,600,000	300		
Slab ring		10,000	200	2,000,000	
(r) In the district, what are the LONGER-TERM WATER & SANITATION SECTOR REHABILITATION NEEDS due to the floods:					
Slab ring		10,000	300	3,000,000	
Food for work		30,000	100	3,000,000	
(s) Any other remarks:					
None					

6. AGRICULTURE, LIVESTOCK & FISHERIES:

(a) What are the district's main crops ?	Rice	Vegetable			
(b) What was the ha. of these crops ?					
(b) What ha. of these crops is lost ?	80%	100%			
(c) What proportion of the total ha. of these crops does this loss represent ?	80%	100%			
(d) What ha. of seedbeds is lost ?	1	1			
(e) What proportion of the total ha. of these seedbeds does this represent ?					
(f) When is the next planting season for these crops in the district	Jan	Nov			
(g) When will these crops normally be ready for harvesting (mm/yyyy) ?	Feb	Jan			
(h) Are seeds for these crops available in the district at an affordable price ?					

(i) Do families currently have seed for these crops, or money to purchase it ?	No						
(j) If no – what varieties of seeds do families require ?	Seed marketing						
(k) In what quantities does a family need the seed per bigha land per crop ?	Paddy	Vegetable	20 kg per families				
(l) What other agricultural needs are there – irrigation, fertilizer, labour etc. and how are the farmers in the district planning to obtain them ?	As per needs						
(m) In the district, what types of livestock are lost ?							
(n) In the district, what numbers of this stock are lost ?	No information						
(o) How many more have been sold in the district ?	No information						
(p) What proportion of the total number of this of livestock does this represent in the district ?	65%						
(q) In the district, is adequate fodder available for the remaining	Not known						
(r) Will a re-stocking of healthy animals from another region be possible ?	Not known						
(s) If so, when should the re-stocking be planned for (mm/yyyy) ?							
(t) What is the supply situation for livestock vaccines and medicines in the district ?							
(u) Describe the extent of the damage to fisheries in the district:							
(v) What kind of damage or loss have they suffered ?							
(x) Quantify the damage to fisheries across the district:	# fish farms damaged	Farm area affected ha.	# ponds damaged	Pond area affected ha.	Loss of fish in nos.	Loss of fish in Taka	Loss of fish in MT
(y) What proportion of the district's fisheries does this represent ?							
(z) How will affected families in the district survive until the next harvest (i.e.Dec 04)?	Information not available						
(aa) In the district, what types and amounts of agriculture-related relief assistance has already been / is now being provided by the various actors, such as GoB, INGOs, NGOs, etc ?	Item:						
	Unit:						
	Amount:						
	Item:						
	Unit:						
	Amount:						
(bb) In the district, what shortages related to agriculture, livestock and fisheries are there and hence what are the SHORT-TERM AGRICULTURE, LIVESTOCK & FISHERIES NEEDS of the population due to the floods:							
<u>Item</u>				<u>Quantity</u>	<u>Unit Cost (Tk.)</u>	<u>Total Cost (Tk.)</u>	
Agriculture, poultry and livestock						0	

(cc) In the district, what are the LONGER-TERM AGRICULTURE, LIVESTOCK & FISHERIES SECTOR REHABILITATION NEEDS due to the floods:			
Four months			0
(dd) Any other remarks:			
None			

7. FOOD:

(a) What are the preferred staple foods in the district?		Rice and Vegetables				
(b) What stocks are normally available in the Local Storage Depots (LSD) in this district ?		Item:	Item:	Item:	Item:	Item:
		Rice	Vegetable	Wheat		
(c) What stocks are held there right now ?						
(d) How many families benefitted from Public Food Distributions in this district in the period before the flood ?	Test Relief:	Gratuitous Relief:	VGF:	VGD:	Rural Maint. Prog./FFW:	NGOs:
(e) How many are benefitting from such targetted food distributions now ?						
(f) Have vulnerable families/groups in this district access to adequate amounts of food right now ?		220,000 families, 300,000 houses				
(g) In this district, is there any change in commodity prices after the floods ?						
(h) What is the district-wide average price (per kg) of coarse rice now (in Sep) ?		18 Taka				
(i) What was the district-wide average price (per kg) of coarse rice in June ?		13 Taka				
(j) In the district, what amount of food are affected families consuming on average, each week ?		Rice (in Kg.)	Pulse (in Kg.)	Oil (in Kg.)	Salt (in Kg.)	Vegetables & fish
		37	3	2	1	2
(k) From which sources are most people buying/getting their food ? e.g. Neighbours, friends, relatives, store purchase, borrowed money/food, Govt GR,VGF, VGD, RMP, NGOs, others		Govt, NGO's and others				
(l) Do most families have any food stocks in their homes right now ? If yes, how long will they last ?						
(m) In the district, are people able to cook in the affected areas ?						
(n) Of the affected families in the district, how many are in need of food and for how long will they need assistance ?		Number of Families:			Period (Days):	
(p) In the district, what types and amounts of food-related relief assistance has already	Item:	No				
	Unit:					
	Amount:					

been / is now being provided by the various actors, such as GoB, INGOs, NGOs, etc. ?	Item:					
	Unit:					
	Amount:					

(q) In the district, what shortages related to food are there and hence what are the FOOD RELIEF NEEDS of the population due to the floods:

<u>Item</u>	<u>Quantity</u>	<u>Unit Cost (Tk.)</u>	<u>Total Cost (Tk.)</u>
NA			0

(r) In the district, what are the medium-longer term ONGOING FOOD RELIEF due to the floods:

Three months			0
--------------	--	--	---

(s) Any other remarks:

None

8. Logistic Considerations:

(a) Are there usable warehouses in or near the affected upazilas of this district?	Information not available					
(b) Who do these warehouses belong to and can they be used to store relief items ?	Govt LSD:		NGO:		Private / others:	
	Available (If yes, #):		Available (If yes, #):		Available (If yes, #):	
	Combined Capacity (MT):		Combined Capacity (MT):		Combined Capacity (MT):	

9. SHELTER & HOUSING:

(a) How many houses were completely destroyed by the flood in the district ?	60,000
(b) How many houses were badly damaged by the floods in the district ?	20,200
(c) How many houses were lightly damaged by the floods in the district ?	10,000
(d) In the district, how many families lost their houses due to river erosion ?	224,000
(e) In the district, how many of the affected families who were displaced are still living in their area ?	180,000
(f) How many houses need to be rebuilt in the district?	60,000
(g) How many houses need to be repaired in the district ?	No
(h) What proportion of the completely destroyed and the damaged houses in this district belong to female-headed households ?	60% of district
(i) Describe the typical house design in this district:	Teen shed, ancha, pucca

(j) What are the usual house building materials used in this district ?		Teen					
(k) Are these materials readily available in the district's markets ?		Teen					
(l) What is the cost of these building materials ?		Item:	Item:	Item:	Item:	Item:	
(m) What would be the cost of building a minimum standard rural house for this district ?		20,000 Tk					
(n) Describe effective practices for flood mitigation in this district :		Information not available					
(o) What types and amounts of shelter-related relief assistance has already been / is now being provided by the various actors, such as GoB, INGOs, NGOs, etc. ?	Item:						
	Unit:	220,000					
	Amount:	200,000					
	Item:						
	Unit:						
	Amount:						
(p) In the district, what shortages related to shelter are there and hence what are the IMMEDIATE/SHORT-TERM SHELTER NEEDS of the population due to the floods:							
<u>Item</u>				<u>Quantity</u>	<u>Unit Cost (Tk.)</u>	<u>Total Cost (Tk.)</u>	
Information not available						0	
(q) In the district, what are the LONGER-TERM SHELTER & HOUSING SECTOR REHABILITATION NEEDS due to the floods:							
VGF cards, relief and Medical team						0	
(r) Any other remarks:							
None							

10. EDUCATION:

Type of school (please provide district totals):	Govt primary	Registered non-govt primary	Community schools	Unregist-ered primary	NGO schools	Madrassahs	Secondary schools
(a) How many were there before the floods ?	No Information						
(b) How many were used as flood shelters ?	20,000						
(c) How many are still in use as flood shelters ?							
(d) How many need to be completely rebuilt ?							
(e) How many need extensive repairs ?							
(f) How many need light repairs ?	No Information						

(g) How many are not currently in a state to conduct classes ?	No Information						
(h) How many is the government planning to repair?	No Information						
(i) What types and amounts of education-related relief assistance has already been and is being provided by the various actors, such as GoB, INGOs, NGOs, etc. ?	Item:	Biscuit					
	Unit:	100 gram					
	Amount:	5 Taka					
	Item:						
	Unit:						
	Amount:						
(j) In the district, what are the IMMEDIATE NEEDS to restart classes in every school and learning centre:							
<u>Type of school:</u>	<u>Item</u>	<u>Quantity</u>	<u>Unit Cost (Tk.)</u>	<u>Total Cost (Tk.)</u>			
Biscuit	As per needs				0		
(k) In the district, what NON-INFRASTRUCTURE EDUCATION NEEDS (chalk-boards, teaching materials, a globe, maps, charts, supplementary reading materials, games, sports items and, for the children - exercise/copy books, pens, pencils, school bags, etc.) are there, to make up for damage/losses:							
Information not available					0		
(l) In the district, what are the INFRASTRUCTURE NEEDS to repair one typical lightly damaged school :							
Teen shed, school need repaired					0		
(m) In the district, what are the INFRASTRUCTURE NEEDS to repair one typical badly damaged school :							
Information Gap					0		
(n) In the district, what are the INFRASTRUCTURE NEEDS to rebuild one completely destroyed school :							
NA					0		
(o) Any other remarks:							
None							

11. ECONOMIC RECOVERY & INFRASTRUCTURE:

(a) What is the normal pre-monsoon season livelihood of most people in this district ?	Information not available
(b) What is the normal monsoon season livelihood of most people in this district ?	
(c) What are the normal main wage-employment activities (e.g. farming, cottage industries, shops) in this district ?	
(d) Do most households in this district have any savings ?	
(e) Have households in this district withdrawn their savings because of the flood ?	
(f) Have households in this district sold or are planning to sell livestock or other assets ?	
(g) How is the job market for wage labourers in this district: satisfactory / not so good / very bad ?	

(h) In this district, what is the average daily wage for day-labourers ?							
(i) Have households in this district sold their labour in advance ?							
(j) Have household members from this district had to migrate elsewhere in search of work ?							
(k) What other short-term coping mechanisms do households have for the next 3 months ?							
(l) In this district, have households taken new loans from micro-credit institutions – how much ?		If yes, #:		If yes, in what range?			
(m) In this district, have households taken new loans from village moneylenders – how much ?		If yes, #:		If yes, in what range?			
(n) What is the most crucial infrastructure in the district that makes the biggest difference to poor people's lives ?							
(o) Is this most crucial infrastructure damaged and, if so, in what way ?							
(p) What types of works are recommended by the people in this district for Cash-for-Work programmes ?							
(q) How many of these opportunities are there in this district ?							
(r) What measures could be taken in this district to increase resilience to future floods of local households and their livelihood practices ?							
(s) What types and amounts of economic recovery & infrastructure-related relief assistance has already been and is being provided by the various actors, such as GoB, INGOs, NGOs, etc. ?	Item:	Seed					
	Unit:	200 Tk					
	Amount:	20 Kg					
	Item:	Blended Food					
	Unit:	30kg					
	Amount:						
(t) In this district, what type of SHORT-TERM ECONOMIC RECOVERY SUPPORT do local people consider necessary:							
<u>Item</u>		<u>Quantity</u>		<u>Unit Cost (Tk.)</u>		<u>Total Cost (Tk.)</u>	
Cash for work						0	
(u) In this district, what type of LONGER-TERM RECOVERY SUPPORT do local people consider necessary:							
Medicine and relief distribution						0	
(v) Any other remarks:							
None							

12. Are there any other general observations that are important to note?
Affected areas under Jenaidah district need essential relief

13. Assessment Conducted By:

Name	Agency name	Agency phone no.	Personal phone no.	E-mail address	Signature
